*Fullstack Developer focused on backend engineering with solid experience in **Node.js**, **NestJS**, and **Spring Boot**. Proficient in developing scalable and maintainable backend services using **SOLID principles**, **DDD**, and **Clean Code** practices. Experienced in both enterprise and freelance projects, consistently improving development efficiency through technical leadership and cross-team collaboration. Passionate about clean architecture, developer experience, and modern backend stacks.*

## WORK EXPERIENCE

### Macropay

Backend Developer

Mérida, Yucatán

March 2024 – May 2025

- Developed and maintained **internal and public platforms** using **NestJS** and **Spring Boot**, aligning with **business requirements** and **code quality standards**.
- Championed the implementation of **clean architecture** and **clean code** to enhance **product quality** and facilitate project **maintainability**.
- Actively participated in the **planning and management** of development activities for each project, utilizing **agile methodologies** like **Scrum** for effective project organization.
- Increased **team efficiency** by reducing **delivery times** and **production errors** through the application of **Clean Code**, **automated unit tests**, and **collaborative code reviews**.
- Implemented new functionalities for **legacy systems**, enabling **refactoring** and **code cleanup** for a higher-quality solution with each delivery.

### BlackSpot

FullStack Developer

Mérida, Yucatán

May 2023 – March 2024

- Developed **software solutions** for clients across various sectors, leveraging tools like **Asana** and **Webflow** to facilitate task agility and refine product delivery in collaboration with the team.
- Optimized **software development time by up to 40%** through the implementation of **agile methodologies (Scrum)**.
- *Implemented **structured planning** and **code modularization**, enhancing software **maintainability** and reducing **production errors by up to 30%**.*

### Freelancer

FullStack Developer

Mérida, Yucatán

July 2022 – present

- I **develop customized solutions** to **automate business processes** and create **internal tools** for clients.
- *I **support students and teams** in learning and applying **development best practices**.*

## EDUCATION

### Universidad Privada de la Península

Systems Engineering

Focused on software design and information technology solutions.

Mérida, Yucatán

May 2024
